### **ABOUT ME**

Laravel Developer with 3+ years of experience in building scalable and maintainable web applications using PHP 8+, Laravel, and Vue.js. Successfully reduced API response times by up to 30% and implemented real-time features used by over 1,000 concurrent users. At Kemework, led backend architecture optimization and launched 20+ features that enhanced platform performance and user engagement.

Contributed to CRM and sports prediction systems at Inom Tecks, improving reliability and user retention. Strong in API development, database design, system security, and cross-team collaboration in agile environments.
