🕒 mhmdatya72 🗣 Mohamed Atya Hawash

Professional Summary

Senior Full Stack Laravel Developer with 5+ years of experience building scalable web applications using Laravel, PHP, and MySQL. Specialized in developing RESTful APIs and ERP systems, improving application performance by up to 40% through query optimization, caching, and indexing. Experienced in delivering high-quality solutions, collaborating in code reviews, and maintaining scalable backend architectures.

Professional Experience

Software Engineering Team Lead / Senior Full Stack Developer

Cord Digital 📁 | *Full-time* | Giza, Egypt | 10/2025 – Present

- Championed review of over 500 code commits monthly and coordinated task assignments, reducing critical production bugs by 30% and ensuring 99.9% uptime.
- Orchestrated the deployment of efficient RESTful APIs, connecting three key external services and improving data retrieval speeds by a measurable 20% for end-users.
- Spearheaded ERP module design for sales, inventory, and reporting, reducing manual data entry by an estimated 35% monthly and improving operational efficiency.
- Engineered inventory query overhaul, cutting average load time from 4.5 seconds to 2.7 seconds, delivering 40% faster access and sharpening finance reporting precision.
- Accelerated database query performance by implementing strategic indexing and tuning techniques, cutting average load times by 40% and boosting system scalability.

Full Stack Laravel Developer

SEO Wolves 📁 | *Part-time* | Giza, Egypt | 07/2026 – Present

- Revamped the user interface and backend functionality for ten distinct client projects, resulting in a 25% increase in user engagement and satisfaction.
- **Accelerated** website loading speed by 30%
- Orchestrated the creation of RESTful APIs and integrated vital third-party services, directly improving data tracking and streamlining analytics processes for ten client projects.
- Spearheaded the development of mobile-first web applications, delivering a fluid and cross-platform experience that boosted user interaction by 22%.

Senior Full Stack Laravel Developer

The Mok Company 📁 | *Part-time* | Giza, Egypt | 01/2024 – 06/2026

- Streamlined API layer and server-side logic, achieving 50% reduction in endpoint latency by refactoring SQL queries and introducing Redis caching for high-frequency calls.
- Designed intricate database structures, achieving a 75% increase in query speed and ensuring seamless data retrieval operations for critical financial data.
- Enforced role-based access control across 12,000+ user accounts, establishing five distinct permission tiers and eliminating unauthorized access incidents during the first quarter post-deployment.
- Championed the full-stack development lifecycle, from concept to deployment, ensuring the successful delivery of scalable and secure applications with 99.9% uptime.

Full Stack Developer

Kemeder / Kemework *Full-time* | Cairo, Egypt | 06/2022 – 10/2025

- Built core marketplace features using Laravel, supporting scalable user interactions and transactions.
- Boosted API performance by 40% using caching and query optimization
- Integrated payment systems and real-time notifications, improving transaction reliability and user engagement.

Full Stack Developer

Inom Tecks | Alexandria, Egypt | 11/2022– 05/2023

- Engineered robust CRM functionalities with PHP and Laravel, directly improving client workflow efficiency and reducing manual task processing by 40%.
- Enhanced system stability by reducing bugs through testing

Education

Bachelor's Degree in Computers and Information

Faculty of Computers and Information

Department of Information Systems - Credit Hours System

2024

Damanhour

University, Egypt

Languages

Arabic

English

Skills

Leadership & Collaboration:

- Team leadership and mentoring
- Code reviews and quality assurance
- Task prioritization and agile workflows
- Release coordination and delivery management

Backend Architecture:

- Database schema design and optimization
- Query optimization and performance tuning
- Caching strategies (Redis / Laravel Cache)
- Role-Based Access Control (RBAC)
- ERP system development

Core Competencies:

- Solved complex backend performance issues, improving system stability and response times
- Managed development workflows and prioritized tasks to deliver multiple projects on time
- Ensured high code quality through detailed testing and code reviews
- Collaborated effectively with cross-functional teams to deliver scalable web applications

Technical Skills:

Backend: PHP, Laravel, RESTful APIs, MySQL, MongoDB

Frontend: HTML, CSS, JavaScript, Vue.js, Blade, Bootstrap

Web Development: Full Stack Development, Responsive Design, Cross-Platform Optimization, API Integration

Tools & Technologies: Git, GitHub, Postman, Composer

Database: Database Design, Query Optimization, MySQL Performance

Testing & Debugging: PHPUnit, Debugging, Chrome DevTools

Deployment: Apache, cPanel, VPS/Cloud Hosting, SSL

Projects

Cordiana ERP System

All-in-One Enterprise Business Management Platform

- Built a scalable enterprise-grade management system.
- Designed and structured modular components for sales, HR, and reporting workflows.
- Integrated RESTful APIs and enforced role-based access control (RBAC).

Taggz App

AI-Powered Event Photo Matching Platform

- Developed high-performance backend APIs for an event-driven platform
- Designed media processing pipelines and role-based access workflows for user management.
- Implemented secure authentication and scalable API infrastructure.

One Step Industrial

B2B E-Commerce & Equipment Supply Platform

- Delivered a robust B2B e-commerce platform with scalable product and order management workflows.
- Optimized database performance, achieving a 35% increase in speed and reduced response latency.
- Designed a custom analytics-driven admin dashboard, improving inventory accuracy and reducing stock discrepancies by 40%.

Tour Egypt Club

Travel & Tourism Booking Engine

- Developed advanced filtering and reservation logic to streamline booking operations.
- Enhanced system performance by 30%, reducing load times and improving overall user experience.

Al-Nasser Group Portal

Enterprise Retail Operations & Delivery Dashboard

- Led the development of a large-scale enterprise portal, optimizing logistics and multi-branch workflows and increasing operational efficiency by 25%.
- Implemented RBAC, multi-tenant architecture, and optimized reporting systems for operational teams.
