ABOUT ME

Software Engineering Team Lead & Senior Full Stack Laravel Developer with 5+ years of experience architecting and scaling web applications, Cloud ERPs, and SaaS platforms using PHP 8+, Laravel, MySQL, Vue.js, and RESTful APIs. Proven track record leading engineering teams, managing full SDLCs, and optimizing backend performance—reducing API response times by 30% and supporting 1,000+ concurrent users. Skilled in system security, database design, and delivering complex B2B/Enterprise solutions in Agile environments.

PROFESSIONAL EXPERIENCE

Software Engineering Team Lead / Senior Full Stack Developer

Jan 2022 – Present

Cord Digital | [Full-time](#)

- ▶ Headed the Software Engineering Department, leading and mentoring the development team, overseeing code reviews, and driving technical architecture decisions across all active projects.
- ▶ Developed and maintained 20+ web applications across various business sectors using Laravel, PHP, MySQL, Vue.js, and Bootstrap.
- ▶ Engineered custom ERP systems and dashboards to manage end-to-end business operations, including RBAC, inventory, sales, and financial reporting workflows.
- ▶ Managed project delivery timelines, task allocation, and the full software development lifecycle (SDLC)—from requirements analysis to deployment and maintenance.
- ▶ Optimized database indexing and Eloquent queries to deliver high-performing, scalable web solutions.

Full Stack Laravel Developer

Jul 2026 – Present

SEO Wolves | [Part-time](#)

- ▶ Developing and optimizing high-performance, SEO-friendly web applications, custom CMS solutions, and digital marketing tools using Laravel, PHP, and JavaScript.
- ▶ Enhancing site responsiveness, core web vitals, and database performance, achieving up to a 30% reduction in page load times across client platforms.
- ▶ Building scalable RESTful APIs and integrating automated analytics tools to streamline reporting and performance tracking.

Senior Full Stack Laravel Developer

Jan 2024 – Jun 2026

The Mok Company | [Part-time](#)

- ▶ Architected and maintained enterprise-grade web applications, SaaS platforms, and internal dashboards, including Al-Nasser Group Portal and Taggz AI App.
- ▶ Designed modular RESTful APIs and Eloquent ORM database schemas to support complex business workflows, real-time analytics, and Role-Based Access Control (RBAC).
- ▶ Optimized backend architectures, database queries, and server-side caching, ensuring low latency and high availability for high-traffic applications.

Full Stack Developer

Jun 2021 – Dec 2021

Kemeder / Kemework | [Contract / Freelance](#)

- ▶ Led the backend development of the Kemework freelance marketplace, delivering 20+ core features with Laravel and Bootstrap.
- ▶ Revamped backend architecture and implemented Redis/Laravel caching strategies, reducing API response times by 30% while serving 1,000+ concurrent users.
- ▶ Integrated real-time broadcasting notifications and payment gateways, boosting transaction success rates by 35% and user engagement by 22%.

Full Stack Developer

Jan 2020 – May 2021

Inom Tecks

- ▶ Built core CRM modules for 5+ client projects, optimizing sales pipelines, reducing sales cycles by 15%, and achieving a 95% client satisfaction rate.
- ▶ Improved system reliability through CI/CD pipelines, automated PHPUnit testing, and API versioning, cutting system bugs by 60%.

Freelance Web Developer

2019 – Present

- ▶ Developed 5+ SEO-optimized web applications and e-commerce portals, increasing user retention by 40% and improving overall speed performance by 30%.
- ▶ Managed end-to-end project deliveries, integrating analytics and payment solutions to improve client conversions and project delivery speed by 20%.

EDUCATION

Bachelor's Degree in Computers and Information

2024

Faculty of Computers and Information – Department of Information Systems (Credit Hours System)
Damanhour University, Egypt

LANGUAGES

Arabic Native **English** Professional

SKILLS

Soft Skills

Advanced Problem Solving & Bug Debugging · Agile Leadership & Cross-Functional Team Collaboration · Technical Communication & Stakeholder Alignment · Adaptability & Rapid Technology Onboarding

Back-End Development:

PHP 8+, Laravel (MVC, Eloquent ORM, Artisan, Migrations), RESTful APIs, MySQL, MongoDB, Composer

Front-End:

HTML5, CSS3, Sass (SCSS), JavaScript (ES6), Vue.js, Bootstrap, Blade Templating

Database Management:

Schema Design, Query Optimization, Seeding & Factories, MySQL Performance Tuning, NoSQL Data Modeling (MongoDB)

Testing & Debugging:

PHPUnit, Laravel Dusk, Chrome DevTools

Project Tools:

Trello, Notion, Figma (Basic), Slack

API Integration & Testing:

Postman, JSON, XML, Laravel API Resources, Authentication (JWT/Sanctum)

Version Control:

Git, GitHub, GitLab

Security:

XSS & SQL Injection Prevention, CSRF Protection, Data Validation & Sanitization

Deployment & Servers:

Apache, WHM, cPanel, Shared Hosting, Cloud/VPS Hosting (AWS, GoDaddy, Hostinger), Domain Linking, SSL

Cloud Storage & Integration:

AWS S3, Backblaze B2, Cloud Object Storage Integration

PROJECTS

Cordiana ERP System — All-in-One Enterprise Business Management Platform

- ▶ Architected and built a comprehensive Cloud ERP solution featuring Sales CRM, POS, HR & Payroll, Financial Accounting, and Electronic Invoicing.
- ▶ Designed modular Eloquent database schemas and RESTful API endpoints, enabling seamless data integration and real-time reporting workflows.
- ▶ Implemented Role-Based Access Control (RBAC) and security sanitization to support secure multi-tenant enterprise operations.
- ▶ **Live Demo:** cordiana-sys.com

One Step Industrial — B2B E-Commerce & Equipment Supply Platform

- ▶ Developed a scalable B2B industrial marketplace supporting multi-category product hierarchies and dynamic machinery quote requests.
- ▶ Optimized database indexing and search queries across 1,000+ SKU items, improving page load speeds and API performance by 35%.
- ▶ Created customized back-office dashboards for sales management, order tracking, and dynamic product catalogs.
- ▶ **Live Demo:** onestepcorp.com

Tour Egypt Club — Travel & Tourism Booking Engine

- ▶ Built an interactive travel engine featuring dynamic tour itineraries, transport reservations, and automated quote systems.
- ▶ Integrated multi-category filtering mechanisms and optimized UI components, boosting user engagement and client conversions.
- ▶ **Live Demo:** touregyptclub.com

Al Manarat Al Munira — Heavy Equipment & Crane Fleet Management Platform

- ▶ Engineered an enterprise web solution for industrial equipment hire, service management, and engineering project tracking.
- ▶ Implemented secure backend workflows for service requests, automated client notifications, and quote handling.
- ▶ **Live Demo:** almanratalmonerah.com

Taggz App — AI-Powered Event Photo Matching Platform

- ▶ Developed backend APIs and media processing workflows for an AI-driven event platform that matches and distributes event photos to attendees via facial recognition.
- ▶ Engineered multi-role system architectures for Hosts, Photographers, and Attendees, supporting batch file uploads, QR invitations, and real-time gallery sync.
- ▶ **Live Demo:** taggz.app

Al-Nasser Group Portal — Enterprise Retail Operations & Delivery Dashboard

- ▶ Built an enterprise internal portal for Al-Nasser (leading Kuwaiti retail brand) to manage logistics, delivery operations, and multi-store workflows.
- ▶ Implemented role-based access control (RBAC), multi-tenant security layers, and optimized reporting modules for operational staff.
- ▶ **Live System:** alnasser.themok.company
